DETAILED ACTION

Statement of Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The previously cited reference, Wu et al. [US 6,981,114 B1], fails to teach copying old data from the current store to the time store, because Wu et al.'s current store is the Mirrored Volumes 240 (in the claimed invention the current store must be separate from the units of storage), while Wu et al.'s Primary Volumes 220 correspond to the units of storage in the claimed invention, and Wu et al. copies overwritten old data from the Primary volumes 220 to the Modification Log 260 to backup the old data. Wu et al. also fails to teach that the time store does not store the new data, because Wu et al.'s Modification Log 260 records post-modification value of an overwritten block for every write command, while the claimed invention only backups the new data to the time store if there is another new write command that overwrites the location of the new data. If there is no overwriting of the new data, the new data is never stored in the time store.

The Applicant's Remarks filed 23 March 2009 also overcomes the objection of claim 23 over the lack of written description for the term "computer readable storage medium" in the specification. In section "I" of the Applicant's Remarks. The Applicant indicated that the term "computer readable storage medium" corresponds to the ROM 294 and memory 296 taught in paragraphs [0146] of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
